4. SHARE CAPITAL

(a) Authorized

At March 31, 2025, the Company's authorized share capital consisted of an unlimited number of common shares without par value. All issued common shares are fully paid.

(b) Issued Share Capital

During the period ended March 31, 2025, no share capital was issued.

On April 2, 2024, the Company closed a non-brokered private placement of 10,000,000 units at \$0.15 per unit for total gross proceeds of \$1,500,000. Under the private placement, Kinross Gold Corporation subscribed for a 9.9% ownership interest in the Company on a partially diluted basis including share purchase warrants (the "Kinross Investment"). Additionally, Kinross has the right, until such time as it holds less than a 3.5% interest in the Company, to maintain, on a pro rata basis, its percentage ownership interest in the Company up to a maximum of 19.9% should the Company undertake any future equity offerings.

Each Kinross Investment unit is comprised of one common share of the Company and one share purchase warrant (a "Kinross Warrant"). Each Kinross Warrant will entitle Kinross Gold Corporation to purchase for a period of sixty (60) months one additional share at an exercise price of \$0.25. If, at any time during the warrant term, Kinross terminates the Exploration Agreement, any unexercised Kinross Gold Corporation warrants shall immediately expire and terminate concurrently with the termination of the Exploration Agreement. The remaining private placement units were comprised of one share and one share purchase warrant (a "Warrant"). Each Warrant will entitle the holder to purchase for a period of twenty-four (24) months one additional share at an exercise price of \$0.25.

(c) Stock Options

The Company has a share purchase option plan under which directors, officers, employees and consultants of the Company are eligible to receive share purchase options. The aggregate number of shares available to be issued upon the exercise of all share purchase options granted under the plan shall not exceed 10% of the issued and outstanding shares of the Company. The plan limits the maximum number of share purchase options issuable in any one 12-month period to any one optionee to 5% of the total common shares outstanding. The Board of Directors shall determine the terms and provisions of the options at the time of grant. The exercise price of each share purchase option shall not be less than the market price of the common shares on the date of the grant less the discount permitted by the Exchange. The maximum term of share purchase options shall not exceed 10 years, or such other term as permitted by the Exchange.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measures of the fair value of the Company's share purchase options.

As of March 31, 2025, the Company had outstanding share purchase options enabling holders to acquire common shares of the Company as follows:

9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Financial instruments are classified into one of the following four categories: fair-value-through-profit or loss ("FVTPL"); fair-value-through other comprehensive income ("FVOCI"); and amortized cost. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	March 31, 2025	December 31, 2024
Cash	FVTPL	\$ 2,018,757	\$ 2,224,246
Receivables	Amortized cost	76,216	62,846
Accounts payable and accrued liabilities	Amortized cost	(25,116)	(41,584)
Lease liability	Amortized cost	(119,185)	(139,579)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

(a) Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's receivables predominately relate to receivables from goods and services input tax credits. Accordingly, the Company views credit risk on receivables as minimal, as it is primarily from an agency of the Government of Canada. The Company is also exposed to credit concentration risk by holding cash. This risk is minimized by holding the investments in large financial institutions or with the Government of Canada.

(b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties meeting its financial obligations as they become due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities and property commitments when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. Management attempts to ensure sufficient cash or liquid investments are available to satisfy budgeted expenditures.

(c) Market risk

Market risk consists of currency risk, commodity price risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits while maximizing returns.

(i) Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although the Company is considered to be in the exploration stage and has not yet developed commercial mineral interests, the underlying market prices in Canada for minerals are impacted by changes in the exchange rate between the Canadian and the United States Dollar. The Company's exploration and evaluation costs are denominated in United States Dollars. The Company has not entered into any arrangements to hedge its currency risk. At March 31, 2025, 1 Canadian Dollar was equal to 0.70 US Dollar. Based on the net exposures as of March 31, 2025 and assuming that all other variables remain constant, a 10% fluctuation in working capital on the Canadian Dollar against the US Dollar would result in the Company's net loss being approximately \$130,639 (December 31, 2024 – \$134,717) higher (or lower).

THREE MONTHS ENDED MARCH 31, 2025 and 2024
(Unaudited - Expressed in Canadian Dollars)

9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (Cont'd)

(ii) Commodity price risk

Commodity price risk is the risk that the fair value of financial assets and financial liabilities or expected future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States Dollars, as outlined above. As the Company has not yet developed commercial mineral interests, it is not exposed to commodity price risk at this time. However, the Company is exposed to commodity price risk as it impacts the Company's access to capital and funding.

(iii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of cash and is limited because of its short-term investment nature. A variable rate of interest is earned on cash; changes in market interest rates at the year-end would not have a material impact on the Company's financial statements.

10. CAPITAL RISK MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the continued development of its mineral properties. Therefore, the Company monitors the level of risk associated with its mineral property expenditures relative to its capital structure.

The Company considers its capital structure to include working capital and shareholders' equity. The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets and capital markets. In order to facilitate the management of capital and the development of its mineral properties, the Company prepares annual expenditure budgets which are regularly monitored and updated as considered necessary.

To maintain or adjust the capital structure, the Company may issue new equity, if available, on favorable terms, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture arrangements, or dispose of mineral properties.

The Company's investment policy is to hold cash and term deposits in interest-bearing bank accounts and highly liquid short-term, interest-bearing investments with maturities of one year or less which can be liquidated at any time without penalties. The Company is not subject to externally imposed capital requirements. There has been no change in the Company's approach to capital management during the three months ended March 31, 2025.
